October 22, 2009

To Whom It May Concern:

Using a public and transparent bidding process, the USAID Agribusiness Project hired "MCB Management Center" to conduct a series of training workshops in the area of "Finance for non-finance managers".

More than 45 people from 23 different companies were trained in July and August 2009. The workshops were extremely successful based on the independent client satisfaction survey and the USAID Agribusiness Project's assessment with the average rating of 4.8 (out of 5 as the maximum score).

The companies that attended the training workshops have realized the value of investing in their staff capacity development, so 25% of the attending companies requested additional training services.

Therefore, the USAID Agribusiness Project would like to recommend "MCB Management Center" as an excellent service provider in the area of professional skills improvement and human resources development.

Louis Faoro
Chief of Party
USAID Agribusiness Project
